It is recalled that BID-GO holds 4,135,802 ordinary shares of Go Internet, representing 77.04% of its share capital, and on May 31, 2024, launched a mandatory full public tender offer for all outstanding shares of GO Internet. It is also noted that BID-GO is wholly controlled by Tiscali S.p.A., which is wholly controlled by Tessellis S.p.A., a company whose shares are listed on the Euronext Milan market ("Tessellis").

Given the above, as well as the indirect control exercised by Tessellis over BID-GO, the Operation constitutes a related-party transaction for Tessellis, BID-GO, and GO Internet. However, pursuant to Article 11 of the procedure for the regulation of related-party transactions approved by the Tessellis Board of Directors on July 28, 2021, the Operation falls within the exclusions from the application of the aforementioned procedure

concerning Tessellis, as it is a transaction concluded between companies controlled by Tessellis without significant interests of other related parties to it. Given the total value of the Operation (exceeding Euro 700,000), it instead constitutes a significant related-party transaction for GO Internet, considering the exceeding of the relevance thresholds set forth in Article 1, paragraph 1, letter a) of the provisions on related-party transactions for issuers of shares traded on the Euronext Growth Milan system.

As of today, the Operation has been approved by the Board of Directors of Go Internet, following the issuance of a favorable non-binding opinion by the Independent Director of Go Internet, Cesare Veneziani, in accordance with the regulations on related-party transactions and the related procedure adopted.

In connection with the Operation, Go Internet will proceed with the publication of the information document required for significant related-party transactions in the terms and manner provided by the applicable regulations.
